## Character Screen

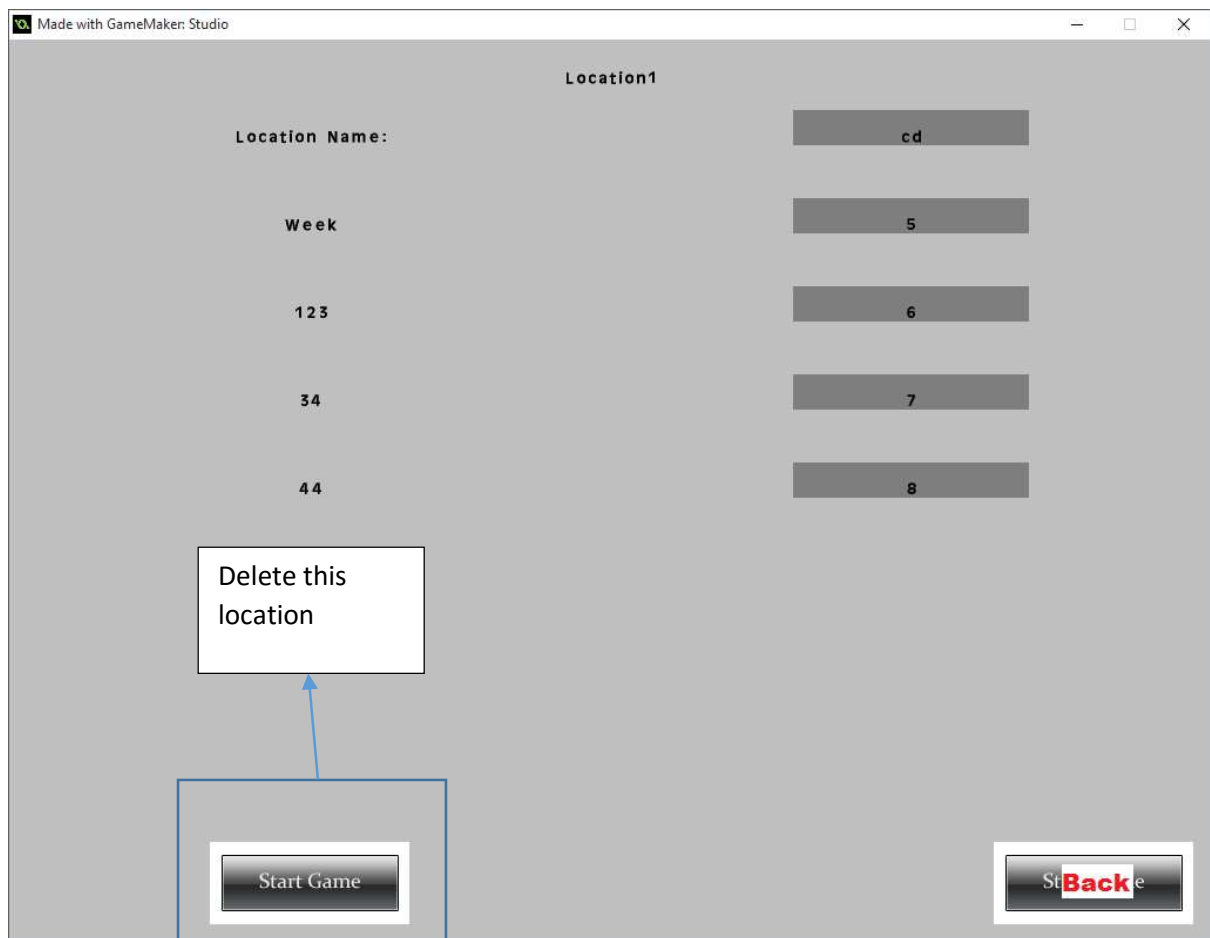

# Diary Screen

## Card Screen

## Location Add/View Screen

This screen will show the current location the user is clicking on, currently it displays the locations name, (this text box info will be stored). You can also delete the current location within here.

## INI file – PLEASE READ

To get the ini files to work, you have to load the editor and create one (using right click on the map screen), it will automatically save them to the location below.

EDITOR ini File path: C:\Users\\*YOUR PC NAME\*\AppData\Local\Editor

To use them in the client (to show they display), you have to create a new folder called “Client” and place the ini file inside.

CLIENT ini File path: C:\Users\\*YOUR PC NAME\*\AppData\Local\Client
